CORFLEX PRESENTS

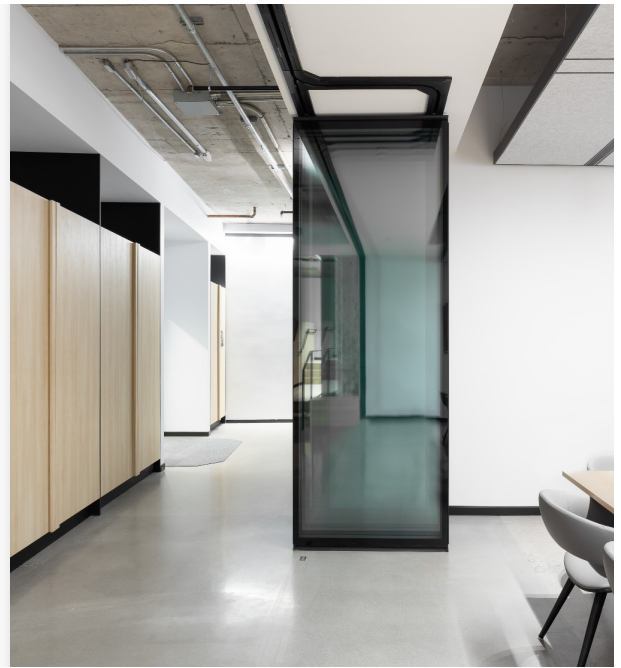

AIA CONTINUING EDUCATION INTERIOR OPERABLE GLASS WALL & STOREFRONTS

Course #: COGW01

Provider: 10019970

Overview of the configurations and key performance attributes of movable glass partition systems available today.

For more information or to schedule a “Lunch and Learn” presentation, please contact your Corflex representative or go to corflex.ca and click on Education.

LEARNING OBJECTIVES

- Learn to identify interior glass wall systems used for commercial interior spaces and how each one suits a space depending on requirements for acoustics, natural lighting and space.
- Learn how much space is needed for storage, operation of the assembly, what the standard layouts are, and how they affect the space requirements?
- Understand the integration of independent structural support and track systems ensuring safety, flexibility, and longevity
- Identify specialty requirements for finishes, hardware requirements for pass doors and panel functionality.
