# CORFLEX 5000-SERIES MOVABLE PARTITIONS

CORFLEX PRESENTS

AIA CONTINUING EDUCATION 5000 SERIES – MOVABLE PARTITIONS

Course #: COGW01

Provider: 10019970

Overview of the configurations and key performance attributes of movable partition systems available today.

For more information or to schedule a "Lunch and Learn" presentation, please contact your Corflex representative or go to corflex.ca and click on the Education section.

LEARNING OBJECTIVES

- Review the environmental focus of projects in a continually evolving list of needs to be met. We will go over the options available to the construction team and the client including longevity, durability and maintenance.

- How to select the best panel design for your project? What options are more easily maintained? What layouts work best?

- When adding a finish to the movable partitions, what is the most durable option? What will best fit the space requirements? Are some panel functions more durable than others?

- Maintenance
